EXPERIENCE

Software Engineering Immersive Student

General Assembly

📅 August 2020 – Present   📍 Houston, TX

Gain over 400 hours of professional web development experience while building full CRUD applications using JavaScript, Express, SQL, PostgreSQL, HTML, CSS, and Sequelize. Through the course, I learned how to use these skills to build responsive and intuitive user interfaces while managing data via Sequelize.

Senior Tax Consultant

EY

📅 September 2016 – Present   📍 Houston, TX

As a consultant at a Big 4 accounting firm, I developed my managerial skills by directly assisting senior managers to coordinate client engagements to ensure individual tax and social security compliance across various jurisdictions. Through the high quality standard I set for my projects and deliverables, I established long lasting client relations which allows us to continue providing services and maintain client retention. Due to the demanding nature of the tax mobility industry, I regularly handle calls to explain complex tax technical topics to audiences ranging from new expats to seasoned business travelers.

PROJECTS

Marshal Crossing

Vanilla JavaScript

- A web browser game that allows users to simulate a simple version of Nintendo's Animal Crossing. Users go through a sequence of scenarios to increase their friendship with the villager to obtain best friend status.

PROFESSIONAL BRAND

I am a detail-oriented software engineer focused on productive collaborations to create seamless and interactive products for clients. I excel at maintaining organization which allows for smoother troubleshooting to resolve issues. As an adaptable learner, I aspire to continuously challenge myself on a variety of projects to further develop my skills while also increasing awareness of different industries.
